

Waterborne epoxy emulsion

1. Description

The waterborne epoxy emulsion is a milky white waterborne resin with excellent anti-corrosion performance and excellent stability qualitative, low VOC content and other excellent properties, widely used in container coatings, metal anti-corrosion coatings, and in civil anti-corrosion coatings.

2. Product parameters

Test items	Indexs	Units
Appearance	Milky white liquid	/
Solid Content	50±2	%
Epoxy equivalent	900-1100	g/mol
Viscosity (25)	300-3000	MPa · s

3. Product packaging

This product is packaged in 220kg sealed iron drums and is not a hazardous material
